ABOUT ME

LifTING & Sepsis Canada research collaborator in the Clinical, Population Health and Health Services Research stream, and a Physiology graduate of Ekiti State University Focused on neuroscience, sepsis, critical illness, clinical research, gut-braiin axis and population health. Interested in research, evidence based healthcare, and translating scientific findings into improved health outcomes.

INTERESTED FIELD

Brain health, Sepsis and Critical Illness, gut brain axis, Space medicine, Clinical Research, Population Health, Health Services Research, Neurophysiology, Translational Medicine, Infectious Diseases.

EDUCATION

McMaster University **Hamilton, Ontario, Canada**

LifTING & Sepsis Canada Health Research Training Platform. **Sept 2026 – Current**

Research Collaborator and Clinical, Population Health and Health Services Research Stream.

Website: LifTING & Sepsis Canada

Ekiti State University (EKSU) **Ekiti, Nigeria**

Bachelor of Science (B.Sc.) in Physiology. 2022 – 2026

CGPA: 4.30/5.00

Website: Ekiti State University

WORK EXPERIENCE

Founder & Developer | MedLite AI Health Information Accessibility Platform. **Nigeria | 2025 – Present**

Conceptualised and developed an early stage AI powered platform to improve access to reliable health information among underserved populations. Applied medical physiology knowledge.

Link: Coding Process

Research Assistant (Laboratory)

Department of Medical Physiology, Ekiti State University **2024–2025**

Collaborated on physiological research activities through laboratory procedures, biological measurements, data collection, ringers preparation, laparotomy and scientific methodology.

Link: Research process and activities

Teaching Assistant (Laboratory **Ekiti Nigeria**

Department of Medical Physiology, Ekiti State University. **2024–2025**

Supported practical physiology teaching for undergraduate students through laboratory demonstrations and explanations of physiological concepts, assisted lab coordinator with lab sessions, graded assignments,

President / Fellow | HEAL Society, Ekiti State University. **Nigeria | 2024–2025**

Led outreach impacting 2000+ people through health awareness; researched primary healthcare public private partnership policy; coordinated member participation, contributed to health awareness and outreach activities and built a succession plan before graduating..

Link: Activity Pictures and Videos

Clinical Trainee | Ekiti State University Teaching Hospital **Nigeria | 2024**

Gained practical exposure to electrocardiography (ECG), including ECG recording and ambulatory cardiac monitoring, assisted with patient reception, basic patient support, and clinical procedures under supervision. Developed familiarity with patient interaction, clinical observations, and routine healthcare delivery.

Research Group Member | SRHIN Research Academy, Neuroscience Group. **2026 –Present**

Led the research team in the research process focused on mental health and climate change, neurology Workforce gap in Nigeria and other ongoing research.

Chemistry Tutor and Practical Instructor | Praise Foundation School. Nigeria | 2026–Present

Tutored Chemistry, guided students through practical exercises, encouraging scientific reasoning, observation, and hands on learning. **Link:** activities

Founder of Impacting Lives Purposely (ILP) Ekiti State, Nigeria | 2022– Present

Create, organize, lead activity and mentor less privileged students into university; provided enlightenment and opportunities reaching 1,000+ people, building on three pillars: Education for Sustainability, Enlightenment and Mentorship, and Advocacy. **Link**: Members group

Communications Lead at United Mass Movement (UMM) 2024 – Present

Facilitated civic and policy discussions on leadership, economy, governance, and national development.

RESEARCH PROJECT

- **Ajanaku, E. I.** (2025). Gluten-Induced Migraine Triggered by Gastrointestinal Responses: Exploring Gut–Brain Axis Mechanisms. Undergraduate research project submitted to the Department of Medical Physiology, Faculty of Basic Medical Sciences, Ekiti State University, Ado-Ekiti, Nigeria.
- **Undergraduate Thesis: Effects of Sleep Deprivation on Intestinal Absorption in Gastric Ulcer-Induced Wistar Rats. June 2025 – Current**

This project involves the study and evaluation of the effects of sleep deprivation on intestinal glucose absorption in gastric ulcer-induced Wistar rats. Using an experimental animal model, the study examines alterations in intestinal glucose transport alongside biochemical markers of oxidative stress and antioxidant defence to improve understanding of the physiological interactions between sleep disruption, gastrointestinal dysfunction and metabolic regulation, with implications for gut brain axis research.

Ajanaku, E. I., Amaji, O. and Abama. E Under submission

The Neurology Workforce Gap in Nigeria: A Narrative Review of Epilepsy, Stroke, and Specialist Capacity. Collaborative research conducted under the Slum and Rural Health Initiative Academy (SRHIN-Academy**).**

Climate Change and Mental Health: A Bibliometric Analysis (2000–2024) | Under Submission

This study examines the research landscape linking climate change and mental health between 2000 and 2024, using bibliometric analysis to explore publication trends, influential contributors, collaboration patterns.

HONOURS AND AWARDS

- **Overall Best Research Poster Presenter Award, SDG 3,** Faculty of Basic Medical Sciences International Conference (FBMSC), Ekiti State University. **Link:** certification
- **Bet9ja Foundation Undergraduate Excellence Award,** Awarded for academic excellence as one of the awardees at Ekiti State University. **Link:** Reference. 2024 –2025
- **Leadership & Changemaker Award,** Health Equity Accelerator Leadership (HEAL) Society, EKSU Chapter.

  Link: Certification **2024 – 2025**
- **International Biological Engineering Conference at Utah State University USA, 2025 Bioethics Essay Top Five Finalist** at the Competition titled "AI: Friend or Foe of a Circular Bioeconomy" **Link:** Reference
- **WARESA America Awards Canada 2025**

  Top Three Nominee for impact and change making in Africa **Link:** Reference
- **Overall Best Graduating Student**, CAC Grammar School, Efon Alaaye, Ekiti State **2019**

SKILLS

Research & Data Analysis: Laparotomy, Research design, literature review, scientific writing, GraphPad Prism, Power BI, Python.

Clinical: Animal handling, Blood grouping, Packed Cell Volume (PCV), Blood glucose estimation, ECG.

Digital & Design: Adobe Illustrator, Canva, PixelLab
